MAHESH R

FULL-STACK DEVELOPER (MERN)

Salem, Tamil Nadu | +91 9342763246 | rm683443@gmail.com | github.com/maheshr1807 | maheshr1807.github.io/protfilo | linkedin.com/in/mahesh-r-18062006r

PROFILE SUMMARY

Full-stack developer specializing in the MERN stack (MongoDB, Express, React, Node.js), with hands-on experience building production-style applications end to end — authentication and RBAC, payment integration, and admin tooling. Runs an active freelance web design practice delivering client-ready static sites for small businesses, alongside a growing full-stack portfolio. Comfortable across both server-side architecture and front-end implementation, with working DevOps/AWS fundamentals.

TECHNICAL SKILLS

Languages: JavaScript, Python, HTML, CSS

Full-Stack / MERN: Node.js, Express.js, MongoDB, React, JWT Authentication, Role-Based Access Control (RBAC), REST API design

Integrations & Tools: Razorpay payment gateway, Nodemailer (OTP), Git/GitHub, AWS (EC2, S3), CI/CD fundamentals

Front-End Craft: Responsive design, cross-browser compatibility, REST API consumption, UI/UX for client-facing sites

FULL-STACK PROJECTS

GV Samy — Full-Stack E-Commerce Platform *Portfolio Project*

Node.js · Express · MongoDB · JWT · RBAC · Razorpay

- Built a complete e-commerce platform to demonstrate production-level skills: authentication with OTP, product management with variants, cart, checkout, orders, and an admin panel.
- Implemented JWT-based authentication with role-based access control (RBAC) and Nodemailer-driven OTP verification.
- Integrated Razorpay for payments and rebuilt the front-end in vanilla JavaScript after starting on React/Vite/Tailwind, to keep the stack framework-free.

Hybrid Voting system — Votexa *Portfolio Project*

HTML . CSS . JavaScript . Node.js · Express · MongoDB · JWT . React.js

- Developed a secure Online Voting System that enables users to register, authenticate, and cast votes digitally.
- The system uses modern web technologies with database integration to manage voter and election data efficiently, while focusing on security, reliability, and user-friendly access.

Catering Website – Static Website *Portfolio Project*

HTML5 · CSS3 · JavaScript

- Designed a 17-section static catering order booking experience —home,about,gallery,booking flow.
- Delivered a fully responsive single-file build, with destination and package detail pages in progress.

FREELANCE WEB DESIGN AND DIGITAL MARKETER— CLIENT DELIVERY

Independent Web Designer & Developer *2025-present*

- Delivered multiple client-ready static websites for local businesses across food service, and fitness — an 11-page South Indian catering brand.
- Diagnosed and fixed a post-launch mobile CSS Grid overflow bug for a live client site, restoring correct display across devices.

INTERNSHIPS

Web Development Intern — InternPe *2024*

- Built responsive websites using HTML5, CSS3, and JavaScript, and completed structured front-end development tasks and mini projects.

DevOps Intern — iStudio *2025*

- Learned CI/CD pipelines, automation tools, and deployment basics; gained hands-on practice with AWS cloud fundamentals.

Full stack development — Skylena info technology *2026*

- Learned full-stack development, including frontend, backend, database integration, and deployment fundamentals using modern web technologies.

EDUCATION

B.E. Computer Science & Engineering *2023 – 2027*

Anna University Regional Campus, Madurai | CGPA: 7.71(6th Semester)
